## Maximum efficiency Minimum footprint

Automatic stainless steel wrapping machine that **weighs, wraps and labels** up to 35 trays per minute.

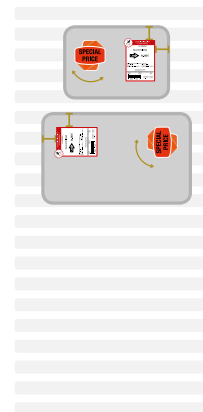

### LABEL

The position and angle of the label application is configurable with the type of tray.

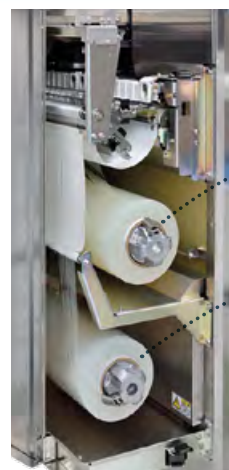

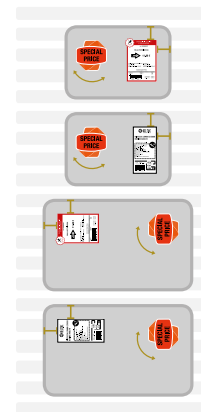

### LABEL + PROMO

Application of additional promotional label, pre-printed or with customizable print.

### VARIABLE LABEL + PROMO

Management of two labels of different sizes with customizable graphics and application and printing of promotional label (PROMO).

**WM-AI is the only existing packaging machine equipped with 2 reels.**

The machine chooses the most suitable film according to the size of the tray. This makes it possible to wrap different formats with considerable savings in material and time.
